

# Deliver outbound voice messages to your customers phones.

As spam filters and firewalls make email marketing increasingly difficult have you considered sending voice messages to your customers phones?

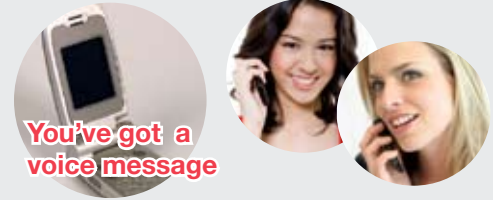

## TPI make outbound voice messaging simple:

### STEP 1

Name	MC Desc	Date Joined	Phone
2273		2008-06-19	909-223-4767*
2273		2008-10-26	909-222-3333
2273		2008-06-18	62-680-4860

2273		2008-11-28	909-624-2832
2273		2008-04-24	909

### STEP 2

Provide to TPI your list of customer phone numbers and either an audio file of the message you want delivered or your script (and one of our professional voiceover artists will record it on your behalf).

TPI uploads your phone number database and message to our dialer and send the voice calls to your customers phones (land lines or cell phones) on the day you specify.

## Examples of voice messaging campaigns include:

Sending newspaper Classified advertisers voice reminders to renew their ads.

Recording artist Pitbull used TPI to send his fans a personal message advising of the release date of his new album.

Delivering meeting reminders to salesforce staff.

Notifying store customers of special events and sales.

“ The applications for voice messaging are limited only by your imagination. ”

Call Sarah at TPI today on 617-425-2650 for more information on executing your outbound voice messaging campaign.
